

VISIONNAIRE

Success Case

Specialized Recruitment and Selection (Hunting)
in the IT Area

Problem

Recruiting qualified professionals in the Information Technology (IT) area to fill various positions, including one that had been open for two years.

Solution

Visionnaire successfully conducted different recruitment processes for BrasilSat thanks to its *expertise* in Hunting, through a meticulous selection process that considers not only the candidate's technical skills but also their compatibility with the company's culture.

Results

BrasilSat managed to overcome a common difficulty for many businesses of various sectors and sizes: hiring highly specialized professionals capable of performing essential functions for the technological development of companies.
