VISIONNAIRE

Success Case

Analysis, Writing and Refinement of Requirements for System Development

Problem

Need for written analysis and refinement of software requirements for a performance management platform development project.
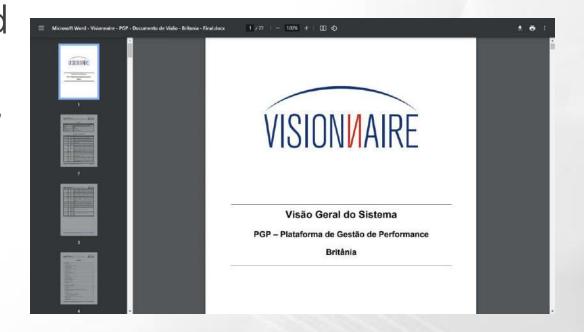

VISION**N**AIRE

Solution

Visionnaire appointed an Agile Squad of specialists who worked collaboratively with Britânia, promoting increased productivity and cost reduction simultaneously.

VISIONNAIRE

Results

Visionnaire's team took care of all aspects involved in the analysis and requirements refinement, such as identification, documentation, and validation of the needs and expectations regarding a system in development.
